SUGGESTIONS ON HOW TO SPA

Keep hydrated by drinking amounts of sufficient water before, during and after your Spa & Wellness experience.

Commence preferably with a refreshing shower to clean, lower body temperature and stimulate circulation.

Sauna promotes circulation, improves metabolism, and relaxes the muscles.

Salt Steam improves breathing, detoxifies the body, heals the skin, and relaxes the mind.

Aroma Steam clears the respiratory system, relaxes the body and mind, improves circulation, diminishes water retention, detoxifies and prepares the skin to receive further treatments.

Taking a refreshingly cold **Rain Shower** revitalises body and mind, and cleanses the skin of toxin residue after the heat experiences.

The **Mist Room** produces a light cooling mist to revive body and mind. Alternatively, crushed ice from the **Ice Fountain** may be applied directly onto the skin, for a cooling, toning and firming effect.

Rest on the **warm stone bench** between stimulating therapies.

The **Relaxation Room** provides an atmosphere of peace and tranquillity with refreshments.

The following facilities are quiet, mixed gender and adult-only zones. Clothing is optional.
